Sanita

Legendary Footwear

For the past hundred years or so, we have been refining the classic wooden clog by continuously applying what we have learned in combination with modern technology. Today, this enables us to produce clogs that meet the steadily increasing demands made on occupational footwear.

We have developed the Sanita clogs - seemingly simple products - into a science and incorporated our unrivalled level of quality into every phase of the process. Durability, stability, fit, flexibility and classic design are decisive, but most importantly, Sanita clogs give back a feeling of freedom and well-being to your feet.

Free and Easy

"Sanita clogs are unique because we take ownership of the entire manufacturing process. During this process, we are in touch with each and every clog right up to the time of delivery. We are constantly testing our products at our own control laboratory to ensure that our customers always get the best."

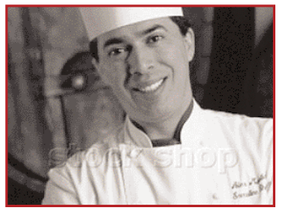
Why I choose Sanita clogs...

Cor van Gorsel, road mechanic, Papendrecht, the Netherlands:
I started wearing my first Sanitas two years ago - and haven't worn any other footwear since. I can't stand tight, laced shoes that imprison my feet. What really won me over to Sanita was the clog's soft, flexible sole. You can't get clogs with a sole like that in the Netherlands, and since I never wear anything but clogs, it's important that they're comfortable to wear. I can walk around in my Sanita clogs all day long without getting a sore back or sore feet.

Jette Sønderskov, doctor, Århus, Denmark:
I bought my first pair of Sanita clogs three or four years ago and have been very pleased with them. I wear them especially at work, because it's important to have good-quality shoes when you're standing hour after hour on end. Sanita clogs have a very soft, flexible sole, which means you can wear them for a long time without getting a backache or sore feet - and they look good, too.

Peter Weidlich, shop assistant, Friedrichstadt, Germany:
I picked up my first pair of Sanita clogs when I was on a summer holiday in Denmark fifteen years ago, and I've been wearing Sanitas 365 days a year ever since. Although Sanitas aren't inexpensive, the extra quality is worth it. I've not been able to find any clogs that are as good and comfortable. And besides, Sanita clogs last a long time.



Werner Wickertsheim, hotel owner and chef, Schenna - South Tyrol, Italy:
As the owner of a hotel where I also run the kitchen and do the cooking, it's important to have proper footwear. It's been more than ten years now since I bought my first pair of Sanita clogs, and I haven't worn anything else at work since. One of the biggest advantages of wearing Sanita clogs is that they don't squeeze or pinch my heels, even though they have a closed heel. And only Sanita makes clogs that are genuinely comfortable.
